

Nadja Lamisch – Manifesto Treasurer

June 2022

Hi, my name is Nadja and I want to run for the OSM Treasurer position.

I live with my family in Munich, Germany and I am in the Web-Development business since 2001. After working for a local web agency, I started my own business in 2009 as a freelancer. Touched based with Joomla! first time in 2012 and fell in love with it immediately. This first Joomla! project was a large site for a choir association and guess what – the site is still active and running smoothly 😊.

Still being fascinated about Joomla! in 2014 I joined the local Munich user-group and got connected to the German JoomlaDay!. In 2018, Leipzig, I was visiting the event the first time and enhanced my network with many of you, as well as I got even more involved in the organisation.

Since 2018 I am a speaker at the JoomlaDay!s in Germany and Austria.

A year later I got part of the organisation team for the German JoomlaDay! and since 2021 we joined forces with Austria and Switzerland to have a D-A-CH event.

Additionally, I was also part of the Joomla! 4 Backend Template Team, batch of 2019.

I have not been part of the OSM or budget discussions for Joomla! in the past, but I do see this as my next step giving something back to the great community. Being freelancer on my own for about 13 years and having organised the last and the upcoming Joomla!DACH events, combined with my structured approach and diligence, I would be happy to be your next Treasurer.

Thanks for reading and I would be happy if you support me and join with me to work together.

Nadja
