

Manifesto Operations DC

Carlos Cámara

carlos.camara@community.joomla.org

TL;DR

I am passionate about Joomla and I want to work for a more connected community, where different departments collaborate to maintain the valuable resources for professionals and volunteers that this community offers.

Who am I?

For those who do not know me, you have to know that I am a technical guy. I love coding, and I am not afraid of the terminal and working on Linux servers. In fact, I use vim as IDE (legend says I opened the program once, and I could find my way out of it...).

After one and a half-term serving as Operations DC, I feel I can help this community keep growing and help everyone on their duties for a better Joomla!

My vision

Last year, when the Vice president asked me about what we have done, I sent him the projects I have on my wishlist for Operations and I think it's only fair to share it with you:

- New Services Provider Directory (this one is almost done, actually)
- Restart Showcase site.
- Restart Capital Team.
- Take advantage of the fully potential of monetization of our properties to keep supporting the project.
- Keeping up with the updates of our Community sites
- Better and more direct communication between departments
- More UX studies of our properties (Right now in progress for JED site)

Most of these initiatives are not my own, and for sure I cannot get the merit for them, but I will work hard towards fulfilling them.

I am convinced we should make things easier, more accessible and more user-friendly.
